Acquirable Timepieces

Press Release

New Arrival: Heroic18 Dive Tool Watches

25 November 2015, Singapore – *Red Army Watches is pleased to welcome Heroic18 to its family.* The Heroic18 lineup introduces masculine and rugged dive tool watches to Red Army Watches' range of acquirable timepieces. Inspired by vintage military dive watches, Heroic18 is a combination of modern case designs mixed with vintage styled dials.

Heroic18 prides itself for its exceptional workmanship and attention to minor details. The polished knurled edges of the S9's unidirectional bronze bezel and the screwed-on crown guards exemplify Heroic18's prowess as an accomplished watchmaker. The applied Heroic18 logo, railway minute track, luminous plots of the watch hands and hour indices of the watch dial share the same colour tone. The brushed finishing on the hour and minute hands and the gilt outline around the luminous plots of the sandwich dial are some of the other subtleties Heroic18 pays attention to. Heroic18 pairs the watch with a hand-stitched shark leather strap to complement the entire rugged appeal of the watch.

The Heroic18 is broadly categorised into two collections – the M9 and S8.

Heroic18 M9

The M9 collection consists of five different models – the M9100, M9200, M9300, M9400 and M9500. The M9 collection features CuSn₈ bronze cases. An alloy of copper and tin, bronze develops a layer of patina over time due to oxidation of the outer layers of the alloy. The patina development varies according to the environment the wearer exposes the watch to, resulting in a watch unique to the wearer. The collection is differed by the dial designs namely, Dot index, Big Arabic Numerals or the California dial.

The M9 collection is made in limited quantities – the M9100 with a special green gradient dial is limited to 99 pieces while the remaining 4 models are limited to 150 pieces.

Heroic18 S8

The S8 collection consists of two different models – the S8300 and S8600. Unlike the S9 collection, the S8 collection is cased in 316L stainless steel. The S8600 is further treated with a DLC (Diamond-Like Coating) treatment to increase the hardness of the case. The matte finishing of the S8 collection gives it the stealth look normally associated with military watches. The S8300 features the California dial design while the S8600 features the Dot Index design.

The Heroic18 M9 and S8 collections are available at all Red Army Watches (Millenia Walk, Wisma Atria, ATRIX) and Krasnaya outlets. The list price of the Heroic18 M9 and S8 collection ranges from S\$1,120 to S\$1,328.

About Heroic18

The founders of Heroic18 are watch enthusiasts passionate about collecting vintage military dive tool watches. Their first venture as aftermarket strap-makers quickly garnered rave reviews in the watch industry. The move into watchmaking was a natural progression for the brand. The fledgling watchmakers continue to break new ground with their unique take on watches paired with their handmade straps.
